

MTM Doors

Colour panel options

Our made to measure sliding door range now has an even larger selection of panels available, making the choice even greater and even more to your style. With a mixture of core colours to choose from, we have also now introduced the most on-trend premium colours as well.

By combining these frame and panel finishes together, you can be as creative as you want. Designing your own unique style.

*Swatch colours are only representative and are as close a match to the actual product as possible. These may differ slightly due to printing restrictions.

Measuring Up for MTM Doors

1. How to measure up for Made to Measure Doors

Measure your opening height and width at the five points indicated on the main diagram to the right. Do this at approx' 620mm away from the back wall of where your Sliding Doors will go to allow for your interior system.

The Minimum door width for all MTM Doors is 610mm.
 Maximum door widths are:
 1180mm for Flux, Reflex & MTM Classic
 1230mm for Glam,
 1160mm for the Shaker,

Maximum opening height of 2500mm.
 Maximum opening Width of 4555mm.

Note: If there is a difference between the measurements of heights A, B or C, this means that your ceiling and floor are not parallel. Your track-set will allow for a difference of up to 25mm, but if the difference exceeds this you will need to make adjustments to your ceiling or walls. (See diagrams 1b, 1c & 1d).

NB: Write down your measurements in mm, in boxes A - E on the order form referring to the diagrams on the right for additional help.

2. How many doors do you require

As long as your chosen door falls within the sizing dimensions in step 1, then you can have as many Doors as you like. (Your door measurements will vary slightly due to the amount of overlaps that will be required, but this is something we will calculate these for you, keeping this process simple).

NB. If you wish to use a 900mm wide drawer for your interiors, either from the Aura or Relax range, your door sizes must be wider than 930mm to allow the drawers to be opened. This also applies to any interior product which needs to be pulled out towards you.

For example:
 If your opening width is 3500mm and you would like 4 doors, each door would approx' be 875mm wide.

3. Panel combination guide for Made to Measure Doors

Create your own unique look by combining the different frame finishes with the variety of panel options, within each made to measure door style. (See the opposite page for the full colour range).
