Alutec

components

Getting you started...

A good way to get started with measuring out your Alutec system is to measure your space and plan out either 550mm wide or 900mm wide sections. Adding on 30mm between each drop for the Stanchions This will give you a good idea of what size components you will need to build your entire furniture system.

As a helping hand, we have broken down the an image below to show you what is needed to create this look.

A perfect solution for any space, in any room, for any home

Please Note: All components come with Bracket fixtures
