SLIDING WARDROBES DELIVERED TO YOUR DOOR

**Standard** sliding doors & storage solutions

# Contemporary Standard Doors

Uncluttered, stylish contemporary doors have been designed with modern living in mind, by delivering clean uncomplicated lines combined with 'on trend' wood effects, mirror and glass.

These doors reflect the most stylish colours, textures and designs. By perfectly pairing these together we have created designs which truly thrive in any living space, and will truly inspire us.

Maximum opening width of **3607mm** with a maximum opening height of **2260mm**

Create, Combine & Inspire. Contemporary standard doors

# Mirror & Glass

**Contemporary mirror door options**  
Choose from the wide range of mirror doors available, with the option of full mirror doors, all encased in silver frames. Or from additional decorative designs such as the 4 panel full mirror doors, the Louvre mirror door, or the frosted detail mirror doors. Also introducing our NEW Floral and Leaf pattern designs.

Combining the latest mirror door designs to present a more stylish & versatile range. These mirror doors create a spacious feel to any room - encased within a modern silver effect frame and a selection of different pattern designs, this range is versatile enough to suit everyone's taste.

- Frosted, clear mirror, decorative and soft white glass doors
- Frame available in silver effect
- Available door widths are 610mm, 762mm & 914mm
- Maximum opening width 3607mm
- Maximum opening height 2260mm

Maximum opening width of **3607mm** with a maximum opening height of **2260mm**

\*Please note that NOT all mirror doors come in all of the 3 standard widths.

# Classic Standard Doors

Create an elegant appearance to your room with either the Decor panel, Cathedral arch, full panel or mirror doors. The selection of wood effects add a classic element in any room and match perfectly with the mirror frame equivalents.

Unlike the contemporary doors these classic designs use existing popular wood effects and colours that compliment any traditionally influenced room. Creating an understated charm, in any setting.

- Maximum opening width 3607mm
- Maximum opening height 2260mm

## Accessories for Standard Doors

SLIDING ROBES DIRECT

17

### Automatic lighting

New to the Standard Sliding Door range, is our automatic lighting system. This lighting system slots between the ceiling and top track, and automatically turns on and off when you open and close your sliding doors. Easy to fit, just simply plug and play.

**Please Note:** The lights work independently, but if you want them to automatically turn on when opening your doors then you will need a Infra-red control box.

Solo Light

Duo Light

Infra-red Control Box

(Please Note: You will need 1 Infra-red fitting for every light pack purchased).

### Don't forget to order!

#### Track sets

Track sets are available in both Silver and White, and will need to be cut to size to fit your opening space (this can be done using a standard hacksaw).

Lengths available:  
1193 - 1803mm

1804 - 2692mm

2693 - 3607mm

### What else may you need?

#### Accessories

If your ceiling height is over 2260mm you'll need to reduce the height by adding a top panel or gap filler. Spacer Blocks, Opening Height Reducer and Fixing Blocks can be used to secure MDF or plasterboard in the excess space to either the side of the opening or above.

**Please note:** If your opening gap is greater than 127mm then use the 'Opening Height Reducer'. If this is less than 127mm then use the 'Spacer Blocks'. To add an end/side panel, fix this using the 'Fixing Blocks'.

# Measuring Up for Standard Doors

### Step 1 How to measure up for standard sliding doors

Begin by measuring your opening space. All doors fit a maximum opening height of 2260mm with a maximum opening width of 3607mm. Doors are available in up to three widths (610mm, 762mm or 914mm).

**Please note:**Doors don't come in all three widths. Please make sure that you are aware of this (selecting your door first) before measuring up. If there is a difference between the measurements of heights A, B or C, this means that your ceiling and floor are not parallel. Your track-set will allow for a difference of up to 25mm, but if the difference exceeds this you will need to make adjustments to your ceiling or walls. (See diagrams 1b, 1c & 1d). This can easily be done using our accessories listed on the previous page (Spacer blocks for gaps under 127mm or the Open height reducer for gaps exceeding 127mm).

### Step 2 Select and fit your Storage System

Begin by measuring your internal space. When fitting the Aura Storage system, decide whether you want the 550mm or 900mm wide shelves or drawer units as this may effect your door choice. Lay the components out first to ensure they fit your space. (All storage solution components come with detailed instructions).

### Step 3 Build the opening for your doors

All doors are made to fit a standard opening height of 2260mm including track. Higher ceilings can be reduced using spacer blocks or opening height reducer.

### Step 4 Calculate your door requirements

The number of doors you will need will depend on your opening width. Refer to the calculation table below for additional information.

OPENING WIDTH	NUMBER OF DOORS REQUIRED	TRACK SET
1193mm (47")	Two 610mm (24")	1803mm (71")
1498mm (59")	Two 762mm (30")	1803mm (71")
1778mm (70")	Three 610mm (24")	1803mm (71")
1803mm (71")	Two 914mm (36")	1803mm (71")
2235mm (88")	Three 762mm (30")	2692mm (106")
2387mm (94")	Four 610mm (24")	2692mm (106")
2692mm (106")	Three 914mm (36")	2692mm (106")
2946mm (116")	Five 610mm (24")	3607mm (142")
2997mm (118")	Four 762mm (30")	3607mm (142")
3556mm (140")	Six 610mm (24")	3607mm (142")
3607mm (142")	Four 914mm (36")	3607mm (142")

1a. Fitting to ceiling and wall to wall.

1b. Fitting to a doorway or window opening.

1c. Fitting with a side panel (if wider than 4555mm).

1d. Reducing ceiling height (if higher than 2450mm).

Step 2. Select and fit your Storage System

Step 3. Build the opening for your doors

Create, Combine & Inspire. Storage solutions

Step 1.measure up

Step 2.calculating components

Step 3.Fitting your system

# Planning and installing the Aura Storage System

## Step 1 Measure up

Measure the width and height of the space available for your storage solution.  
**Please note:**Telescopic posts fixed between the floor and ceiling are used to support the shelving/drawers and have an adjustment range of2700mm.

## Step 2 Calculate components

By choosing different drawer and shelving sizes you can create a unit to fit any individual space, which can be adapted to suit your changing needs, whenever you need.

## Step 3 Fitting your storage system

All components come with detailed installation instructions. Make sure you pick up everything you need to complete your project.

For further help on installing please visit[www.hdhc.com](http://www.hdhc.com)

**Note:** Layout your storage components including your telescopic posts before fixing them, to make sure your space is correct.

# Getting you started...

Putting the Aura Storage system together for the first time can appear quite daunting. As a helping hand, these 3 starter kits have been developed to help kick start your Aura Storage system successfully.

### Kit 1. (1250-1850mm wide)
